

GAP DRAUGHT

offered in partnership with

Specialised Dispense Systems (Pty) Ltd

Smart Draught Solution for Bars and Restaurants...

BARS & RESTAURANTS can...

- **Increase** profitability – bill more of what you pour!
- **Monitor VARIANCES** – compare draught poured vs sold – DAILY
 - **Manage Draught Stock** – no more weighing of kegs!
 - **Reduce** draught wastage
 - **Prevent** disasters (by responding to ALERTS)
 - **Track & compare** draught consumption
 - **Automated detection & removal** of sanitisation volumes
 - **Benchmark** your BAR against others

How does it work?

We connect flow meters & telemetry devices to your draught equipment and beer lines. Data is uploaded in real time to our Device Management Platform. Results and performance can be monitored on our Software Application that is available on Desktop or

Features & Benefits

LIVE TRACKING OF DRAUGHT CONSUMPTION

- By Brewer, Bar, brand, date range, per pour

MONITOR DRAUGHT QUALITY

- Beer Temperature, freshness

PROMOTIONS

- Monitor the effectiveness & impact of promotions on beer consumption

AUTOMATED STOCK MANAGEMENT WITH ALERTS

- Email notifications when stock levels hit minimum threshold
- Enter stock receipts and make adjustments

TRACK AND REDUCE WASTAGE

- Monitor over/under pouring
- Monitor pouring efficiency

BENCHMARKING (*Optional)

- Compare your Bar/Brewery to others nearby

EMAIL ALERTS

- Temperature
- Cooler ON/OFF
- Power failures

SOFTWARE APPLICATION

- Mobile/Desktop versions
- View a range of reports

AUTOMATED SANITISATION DETECTION

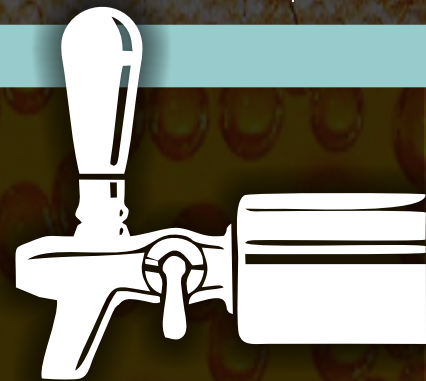

- System automatically detects & flags sanitisation & removes from pouring volumes

DEVICE MANAGEMENT PLATFORM

- Calibrate beer brands
- Set up Bars/Brewers/Taps/Brands
- Configure Alerts
- Enter draught sales prices

VARIANCE CALCULATOR

Compare volumes sold to actual volumes poured (daily/monthly)

Testimonials

- Nadine Myburgh (the Cellar)

"Gap-draught has not only changed my way of thinking about draught stock but has saved me time and money. What a brilliant product! I Regret not getting it sooner."

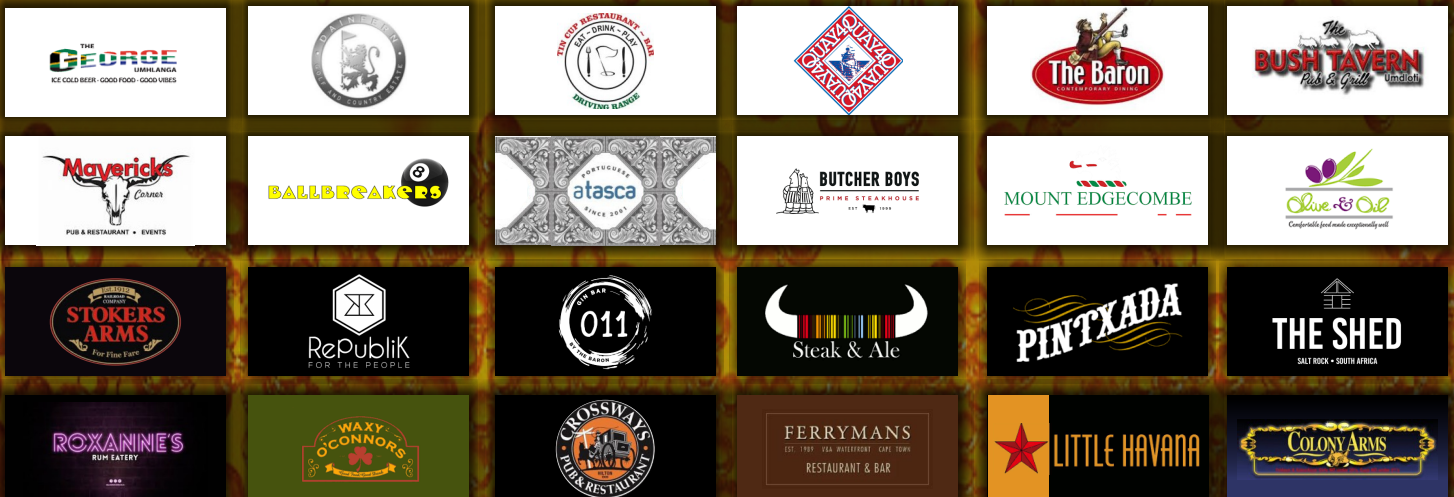

- Pierre van Zyl (Owner - The Hops Ballito)

"We have been in business for many years and our biggest loss on stock was that of Draught. With the Gap Draught system we are able to measure; tap usage, the amount poured each time, and very importantly, the time the taps are being used. These three controls are paramount to ensuring that Draught usage is in line. We have brought our costing of draught down by 1.5% which equates to a huge saving. Thanks so much for all the hard work."

- Gareth Spencer (Director - The Baron Group)

"The Baron Group started testing the GAP Draught system about 6 months ago. We installed the system in one of our stores to see if what Craig and Grant were saying was true. Within a month we had installed across the entire group and have been nothing but impressed with Craig and Grant's passion for what they do. They have assisted us in understanding our draught losses and realising where we can improve and reduce these losses. What we have learned from partnering with them and Gap Draught metering systems has been a real eye opener and I for one suggest that if you aren't using them then it will be to your own detriment."
